

Bikal Kharal

As an IT graduate with beginner level skills in Flutter and React, I am excited to bring my passion for software development to a challenging role in the IT industry. I have also gained experience in agile development methodologies and project management through my academic projects and internships.

EXPERIENCE

Ayaansh Technologies, Patan— *Intern (Flutter)*

Jan, 2022 - Apr, 2022

Worked with product and design teams to develop and maintain reusable and scalable UI components using Flutter and conducted UI testing and debugging to ensure the application's performance and stability.

EDUCATION

Islington College, Kamapokhari— *Bachelor in Information Technology/Computing*

2019-2022

Graduated with a Bachelors of Information Technology from Islington with Upper Second Class Honors. I gained technical skills as well as practical knowledge while studying there.

Araniko H.S School, Biratnagar— *High School*

2015-2017

Completed High School with Science as major with first division.

PERSONAL PROJECTS

Agro Nep

https://github.com/kingvikal/agro_nepal

This is an eCommerce application developed using Flutter as part of the academic coursework. The application integrates external libraries and APIs and is designed to provide an intuitive and responsive user interface for customers to browse and purchase agricultural products.

Hotel Booking

<https://github.com/kingvikal/hotel-booking-frontend>

This project is currently under development for a hotel booking web application developed using React for frontend. The frontend implements fetching hotel data from API to get hotels and its availability.

English, Nepali, Hindi

Hotel Booking Backend

[*https://github.com/kingvikal/hotel-booking-backkend*](https://github.com/kingvikal/hotel-booking-backkend)

This backend project is currently under development for the hotel booking web application developed using NodeJS/ExpressJS. It uses MongoDB atlas as a database and creates an API for users, hotels and bookings.

Portfolio Website
